

Local Flood Risk Management Strategy (2022-2027)

Q1 Do you agree that this draft strategy sets out the most significant flood risk issues for South Gloucestershire?

Yes

No

Q2 If not, please explain what you think is missing?

Q3 From your opinion of the strategy, how important are the following key themes for managing the risk of flooding in South Gloucestershire?

	Very important	Important	Neither	Not Important	Not very important
The use of Natural Flood Management (NFM) measures	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Promotion of Sustainable Development (including use of SuDS)	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Biodiversity	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Climate Change	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>
Community Involvement	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>

Q4 Please make any comments or suggestions about the key themes?

Q5 Is it clear from the strategy which Risk Management Authority is responsible for managing the different types of flooding?

Yes

No

Q6 The draft strategy sets out objectives for managing local flood risk (How strongly do you agree or disagree with each of the following objectives?)

Strongly agree Tend to agree Neither agree nor disagree Tend to disagree Strongly disagree

Evidence: We will enhance or strategic understanding of flood risk from all sources, both in the present day and with climate change

Resilience/Awareness: We will work with communities to raise greater awareness of present and future flood risk through engagement, support and education to help them to become more resilient to future flood risk, considering the effects of climate change on different sources of flooding

Adaptation: We will work with communities to implement adaptive approaches to enhance the natural and built environment

Collaboration: We will work with all risk management authorities and stakeholders to achieve a consistent, co-ordinated and risk-based approach to flood risk management

Sustainability: We will contribute positively to sustainable growth and development, and support environmental net gain by influencing wider development, redevelopment and regeneration plans to deliver flood risk benefits, whilst enhancing biodiversity and promoting flood risk management measures that work with natural processes in our catchments

Opportunities: We will seek opportunities (including funding, research and innovation) from existing and new sources to invest in making communities resilient to flooding now and in the future

Please add any comments:

Q7 In Sections 6, Appendix A (County Wide Action Plan) and Appendix B (Priority Catchment Action Plan) of the draft strategy we set out the **measures and actions** proposed to meet the objectives and so manage the risk of flooding in South Gloucestershire. How strongly do you agree or disagree with these **measures and actions**?

- Strongly agree
- Tend to agree
- Neither agree nor disagree
- Tend to disagree
- Strongly disagree

Q8 Please make any comments or suggestions about the proposed measures and actions:

Risk from flooding can be managed in different ways. For instance, by avoiding living in areas at risk of flooding or adapting how people can live in these areas by improving flood warning and forecasting and helping communities prepare for flooding if and when it does happen. Building flood defence can reduce the damage to properties prone to flooding and learning from flood events can help improve how situations are dealt with in the future. The draft strategy proposes new measures to manage flood risk alongside those already agreed and ongoing.

Q9 Across all the proposed, agreed and ongoing actions, do you think the draft strategy has the right balance between the resilience themes in the action plan (anticipate, assess, prepare, recover, reduce and respond)?

- Yes No

If no, please explain further?

Q10 Are there any other actions that you think should be included? If so please explain what they are and why they should be included? Please say who should be responsible for these measures?

Q11 One of the key themes of the revised LFRMS is to increase awareness of flood risk and riparian responsibilities within local communities.

- | | Yes | No |
|--|-----------------------|-----------------------|
| Are you aware of your flood risk? | <input type="radio"/> | <input type="radio"/> |
| Are you aware of your riparian responsibilities if you have a watercourse/culverted watercourse running through your land? | <input type="radio"/> | <input type="radio"/> |

Please provide any comments you have on the above?

Q12 How strongly to you agree or disagree with the catchment based approach to flood risk management?

- Strongly agree
- Tend to agree
- Neither agree nor disagree
- Tend to disagree
- Strongly disagree

Please make any comments about the catchment based approach:

Q13 Please use this space to make any other comments you have about the draft Local Flood Risk Management Strategy:

Q14 Please tell us whether you are responding to this survey as an individual or as an organisation to allow us to understand the views and concerns of different groups of respondents.
