Date: 6 March 2013

Dear Mr Crysell

**South Gloucestershire Examination in Public – Additional Hearing Session
March 2013**

I understand that in response to your request for additional housing numbers South Gloucestershire Council have proffered the site at Morton Way (North), Thornbury.

The purpose of this letter is to advise that the Environment Agency has no objection in principle to the site being developed. We are already in discussions with the developer's consultants on flood risk and surface water management issues and can confirm these will be addressed to safeguard both the development on the site and avoid exacerbating flood risk downstream.

Should you require clarification on our position then please let me know.

Yours sincerely

BARRY SMITH
