

MATTER 17 - GREEN AND COMMUNITY INFRASTRUCTURE & CULTURAL ACTIVITIES, SPORT & RECREATION – POLICIES CS2, 23 & 24

Main issue:

Does the CS adequately identify the need for the infrastructure required to support further development while addressing current deficiencies?

- Q1 Should the policy or supporting text to policy CS2 acknowledge that the Council's objectives for existing or new Green Infrastructure provision will not necessarily affect all areas identified in the Strategic Green Infrastructure Network diagram?**
- Q2 Should policy CS2 include reference to the contribution of woodland as part of Green Infrastructure initiatives?**
- Q3 How will viability be taken into account when assessing the need for facilities and how will the priority for different facilities be determined?**

- 1.1 We refer to our statement on Matter 22 Q3 with respect to the addition of bullet 6B of Policy CS25 (possible identification of a major sports facility)
- 1.2 Nothing further to add to our previously submitted comments and our comments made in relation to Matter 16.
