

**Additional Comments re Morton Way Development**

1. In addition to comments made by me on 17 August as part of the S Glos consultation and recorded in the documents section of the planning application.
2. Drainage – during the recent storms there has been flooding on Crossways Road not far from the proposed development. Where are the flooding charts which detail the effect of all the proposed developments?
3. Transportation. More details need to be given about the walking times from the Morton Way development into town and schools – how were these calculated? What routes were taken? Who was walking?
4. Since the Inspector's report, the owners of Tytherington Quarry have said that this is closing. How would the proposed developments alleviate traffic by use of the rail line? Why is this not on the CIL 123 list?

I may wish to comment further
