To the planning inspector.

Thank you for giving me the opportunity to air my views on the Norton way site.

It is a particularly special place to us, looking down from the top road on the hill, we tried to visualize 300 houses on this lovely place.

One of the problems is the boundary where the houses will break the continuity of the road, fence and fields. If they are going to be built at the bottom of the hill, there will be a problem of flooding.

Thornbury was spoilt in the 70s by planners pulling down a lot of cottages which could

have been saved due to progress
don't let a planning decision
ruin more.

Thank you for reading this

This is not just 300, This is about
adding another 1200 people into
Thornbury :-

- Schools
- Doctors
- Infrastructure

etc if it is assumed 4 persons
per house. Any long term plans for the
above? This of course is on top of the
500 already planned for Park Farm.

I expect This is a short term gain for land
sell-off but not about the longer term issues
BRC.
