

**Vincent Clutterbuck – Response sent 30 April**

Dear Whomever it may concern

As in recent light it has been made apparent to me that the Government has stopped its Top Down Regional Strategy for Housing requirements within the South West which includes the Hambrook (East of Harry Stoke) area for which I reside. The Government has gone on to stress that they've reduced the amount of housing needed which is pure common sense!!! So why is it that South Gloucestershire Council still see there is a need for the tsunami wave of housing to butcher our local communities??!!! As I've been in meetings with council representatives who keep claiming like a broken record how its the Governments top down strategy being the reason for this crazy estimates for housing and have given NO other reasons or have provided NO evidence for this housing need always hiding behind this Government Strategy!! Now this Strategy has been ABOLISHED I feel that we as local residents have got the right to order the council to provide evidences with substance to back up this building butchery which is already in progress in GREEN BELT land which should only be allowed to be built on in special circumstances!!! So as the Programme Officer you have the duty to provide us local residents with this evidence instead of just hiding behind a strategy which has now gone!!! Which us local residents are very keen to examine!!

I looked forward to hearing your evidence hopefully through the same two mumbling council representatives who fed us with the top down strategy in our last meeting because that's all that came out of their mouths so it would be nice to see if they are capable of saying something different.....

kind regards

Mr Vince Clutterbuck
