**Categories:** Green Category

We understand that the Council has designated areas within the Parish and Village of Iron Acton including The Green, The Meadows and further afield Engine Common as "Designated Green Space". Though only regular visitors to Engine Common we wish to applaud the Council for their vision in recognising that such areas are of vital importance in retaining the rural character of this Parish which may otherwise be lost to the onward march of developers. We know residents of Yate also enjoy the benefits of walking and cycling along the country lanes and footpaths which are almost literally on their 'door-step' and it would be sad if these were to disappear. This rural countryside so close to the City of Bristol is well worth preserving and we wish to record our thanks to the Council for appreciating the benefits it provides to both local residents and visitors alike.

Thank you
