## 6. ADDITIONAL COMMENTS

The site is well located in relation to local services and facilities and is highly sustainable for development. The proposed residential development will be sensitively designed given its semi-rural location. With regards to deliverability, the site does not fall within any landscape designation such as Green Belt, AONB, SSSI, Special Landscape Area, Conservation Area nor Registered Park and Garden and does not fall within any historic designation such as an Ancient Monument, Conservation Area or contain a Listed Building. In addition, the land does not fall within, or adjacent to, a designated flood plain; as identified by the Environment Agency's latest flood plain mapping. There are no legal restrictions to preclude the development of the site. It is within the ownership of one willing landowner and subject to planning permission, can come forward immediately. It is considered that development of the site will be completed within 30 months from the granting of planning permission.

Therefore, development at this site will assist the local community meet its stated aspirations for modest, small scale development that will sustain rural life. The Parish's ambition is consistent with the National Planning Policy Framework, which supports 'thriving rural communities' and promotes 'sustainable development in rural areas'. Please see accompanying Representation/Response to the November 2015 Regulation 18 Consultation: Including Additional Housing Allocations for further details.
