Subject: Policies, sites and places plan - Elm Park site consultation June 2017

Having looked at the documentation regarding the above site, I strongly disagree with the plans. The land in question contains a large portion of the Filton Community Garden which has been lovingly created and maintained by Filton residents and is widely used by the community.

In addition to the Community Garden it will also effect the skate park, again widely used. You would be destroying mature and well established trees.

This is NOT something that Filton residents want and we will fight to prevent this land grab from our local community.

Regards

Claire Troote.
