

STATEMENT OF REASONS

Catbrain Hill Surfacing and Footway

Background

Funding has been allocated by the West of England Combined Authority (WECA) to develop attractive cycle routes and links to the former airfield development site. This scheme forms part of this overall project.

Purpose of the scheme

The purpose of the scheme is to provide consistent road layout along the entire length of Catbrain Hill. This will link into the existing footpaths by the watercourse and also provide a foot and cycle link into the old airfield development.

Proposed scheme

- To provide a new road surface and footway similar to the rest of Catbrain Hill.

Drawing reference

A plan of the proposed shared path is shown on Drawings T402-341-11

Timescale

Subject to the comments received at consultation and public advertisement, and further funding being secured, the proposals are planned to be implemented during the 2019/20 financial year.
